Good morning all,

This summer we will be embarking on a new organized opportunity for teachers. We will be piloting a small group of 10 returning teachers to participate in an externship program with our area businesses. This will be similar to what I set up with our student interns where teachers will be able to spend some time in area businesses to better understand how class content is present in community settings.

The commitment is for roughly 10-20 hours of externship time (which may be spread out between one or more businesses) and an interview with our Communications Manager, Anne Robertson. Participating teachers will be compensated at the curriculum writing hourly rate per Article 6.10 Subsection 2 of the [teacher contract](#). This opportunity is open to teachers in grades E-12. Please fill out [this form](#) with the application questions. Please note that this application starts the process for continuing conversations and that placement is dependent upon employer interest and availability.

Please reach out with any questions and thank you for your consideration
