

Special Programs

June, 2017

Special Education

Special Education Reporting time is here. There are many ODE Reports that are due right after the end of school.

We are currently working with Willamette ESD on looking at our Autism Services. As a Special Education team, Willamette ESD employees, Mindy Arthur and Megan Cleary we are looking at all the areas of criteria to serve Autistic kids and finding our priorities to create systems to support the students as well as teachers.

English Language Learners

The ELL students have just finished up taking the ELPA21 test. That is a Federal requirement that we test their English proficiency level annually. This will help to decide how services will be provided for next year.

AVID- Advancement via Individual Determination

2017 was our first school year to have Seniors in the AVID program. This was a great accomplishment for the Sheridan School District. This also meant another layer of data collection. This data showed that there are some areas that we can put into SHS to give all juniors/seniors more opportunities.
