Coppell ISD Intervention Services requests the approval of the attached contract from SunGard Pentamotion for their program IEP Plus. This IEP Plus program will replace the SEAS program that the department has wrestled with for years. IEP Plus is from the same company that created and installed the student information program, E School Plus, that the district now uses. Having the programs from the same company will allow information to flow directly from one program to another, alleviating the possibility of incorrect information from dual entry. Also, this program calculates PEIMS information directly, without the many man hours spent calculating it on the old SEAS program. The SunGard Pentamotion personnel have presented to the executive director and directors of Intervention Services along with many of the staff members. Our personnel confirmed that the options with the new program will meet our needs moving forward. We have had Chad Branum and the technology department speak with the SunGard personnel to confirm that our system will meet the needs of the program and that it will conform to our standards. Sid Grant and our attorney at Walsh Anderson have reviewed and Okayed the contract.

Thank you for your consideration.

Montie Parker, Director of Secondary Special Education/Section 504
