From: Theresa O'Brien, Chief Academic Officer

Subject: Operation Student Success to the Board of Education

The State of Michigan passed Reading Bill 4822 last October. We have several aspects of the law already in place through our Operation Student Success model. This fall, we will use that model to create a systematic way to provide students the reading support they need and a system for collecting the data.

I would like to request an opportunity to present what the district will be doing to adhere to the requirements of this legislation, as well as review the practices and processes we will be utilizing in grades K-3 in order to support students with reading at grade level. Please consider adding this agenda item to the August 14, Curriculum Committee segment of the Board of Education Meeting.

Thank you for your consideration of this request.
