## Maintenance Report 02.23.22

**High School-** The kitchen floor drains plugged a couple weeks ago. While working on it we discovered that there is a grease trap in the floor in the storage room directly behind the kitchen that has not been cleaned out in some time. This caused a bit of fowl odor to spread throughout the school, despite our efforts to contain it. It was unavoidable, but now that we are aware of it, we can schedule an annual summer cleaning to prevent this from happening in the future.

The auditorium lights are still having issues and have gotten worse with time. I have scheduled a licensed electrician to come in and figure out the problem and hopefully get the system back up and working.

**Middle school-** The middle schools gym heating pumps when out a few weeks ago and we have been heating the gym with an alternative source till the new pumps arrive. They did arrive the second week of February and have been installed and are working great.

**Elementary School-** The school is holding up and doing well, we have been doing standard PM's and CM's.

If there are any questions regarding maintenance, please don't hesitate to ask.

Daniel Nelson  
Maintenance Director
