

2020/2021

Club Name Welding Sponsor Zebah Burdeau

**Club Goals:**

To provide opportunity for students to build projects and sell them through a silent auction to the community.

The money we raise can provide opportunity to buy material to build personal projects for the students.

Some examples could be a headache rack for their truck or a front or rear bumper.

Other ideas I had in mind is using the Plasma table to cut out designs and paint them.

The Plasma table could cut out designs to be installed into tail gates, headache racks.

I want students in the welding club to gain experience in customizing and being creative with metal.

---

---

---

Proposed Meeting Dates: Wednesday 3-4 pm

---

---

---

---

Summary of Proposed Club Activities: I would like to have the parents of the students to design a meaningful picture that we can cut out with the Plasma cutting torch then clean it up and paint it to display it at their home. Another activity I would like to do is build coat racks out of horseshoes.
