

Quarantine for Close Contacts.

- If Vaccinated they don't have to quarantine unless they are symptomatic.
- If they are not wearing and are within 3 feet for 15 minutes they will be quarantined .
- If they are wearing a mask the distance is 6 feet for 15 minutes in the day.. If they (positive person and close contact) are wearing a mask they can test to stay. They would test in Day 1, 3, 5, and 7. Our test qualifies for this.

There is no close contact for outside.

This was in the plan, but until dealing with it, I wasn't clear on this either: Readers Digest version-

So other than lunch we should not have any quarantines if students and staff are wearing their masks.
