

## HEALTH AND SAFETY SCREENER

### Introduction

Organizations that serve young children have an obligation to assure that children in their care are in healthy and safe environments.

This health and safety screener will help organizations to identify where they need to make changes and build capacity in order to ensure children are healthy and safe while in their care.

### Suggestions for Use

1. Complete a health and safety screening for each site where children receive services
2. Mark each item in the screening form “yes” or “no”. Provide descriptions for items marked “no”.
3. Determine issues, priorities, and staff responsible for actions and improvements within each site and across the program.
4. Follow up to assure improvements are made in a timely fashion.

*This screening does not include all applicable Head Start Program Performance Standards, nor does it cover every possible health and safety concern or replace each grantee’s responsibility to ensure ongoing compliance with local, state, and federal health and safety requirements.*
