Presented by:  
Chris duBois  
Superintendent

**ACTION**

**BACKGROUND INFORMATION**

We are updating our 3-Year Technology Plan. This plan will help us budget and direct district-wide technology implementation and infrastructure. Elements of the plan will be used to develop instructional practice and to evaluate our eligibility for e-Rate funding, grants, etc. in coming years.

Mr. Harmsen and I both recognize that the District has paid regular attention to providing access to technology for both productivity and instruction, but we have fallen behind as a result of the rapid pace of technology evolution and hesitancy about making too infrastructure changes the last several years in such a rapidly changing environment.

**ADMINISTRATIVE RECOMMENDATION**

We need to pay serious attention to providing teachers and students with ready access to flexible, up-to-date information systems and hardware. We are expanding integration of technology throughout the curriculum, and hoping to leverage wireless and interactive technologies to maximize student engagement and provide outstanding resources to staff and students.

Mr. Harmsen and I would like authorization to move aggressively on this plan. We will have a firm projected budget / spending plan for your consideration at the meeting.

**APPROVAL/DISAPPROVAL**
