

PERSONAL LEARNING DEVICES

We are currently in our third year for the initial group (current 5th grade), second full year for grades 4-12 and year one for grades K-2; the lease on our equipment is done at the end of the 2016-17 school year. We have some questions that need discussion:

1. Do we want to go through an evaluation process to determine the following:
 - A. Do we continue the program as is?
 - B. Do we continue the program with some changes; if so, what would those changes be?
 - C. Do we discontinue the program? If so, what are the short and long-term implications of that decision?
2. Is the Board comfortable with simply renewing the program without a formal evaluation process?
3. What sort of process and timeline would be reasonable to ensure that interested parties have the opportunity to participate and decisions are made in a timely fashion so that we have time to carry out the decisions of the School Board?
4. Are there other questions or items for discussion?
