# Student Perceptions

“The benefits of online seem to be endless but I will list a few, the 2 week grace period is a life saver for when I get sick or when I go on vacation. Also the flexibility of an online schedule allows time for me to get a good work week in and still have time for school and free time.”

“Being online has made me more self-sufficient. It has also given me a chance to take part in activities that I like more often.”

“It helps because I have anxiety and ADHD, and in-person school doesn’t work well for me. I also have a lot of appointments to go to, so it takes time out of my day.”

“Online has helped me so much. I have a full-time job as well as helping out on the farm. It gives me free time and ability to add to my life.”

# Student Perceptions

“Being online has helped me work more. It has also helped me spend more time with my family and help around the house.”

“Being a full time online student has given me the time to do more not only for myself, but for my future. As a student who will soon be graduating, doing online school has given me the opportunity to work more at my job and has helped me be devoted to a routine, where as if I was in school, I couldn’t have. I’m very grateful to be able to do online school.”

“Online schooling is a great way of learning, having flexibility, and to go at your own pace. Besides the due date on assignments, you can take your time, and maybe even focus a little better.”

Any questions?
