## Principal's General Narrative:

The first six weeks are over! The second six weeks will be over soon. There have been many activities that enhance the partnership between parents, students, and teachers, such as Football Parent Night, Volleyball Parent Night, Pep Rallies, and athletic events. Band Parent Night is coming up Oct 31<sup>st</sup> and many other events are scheduled before the winter break. These events are opportunities to show our students that we are all in this together and are here to help them achieve the highest success.

Students continue to be active in the classroom and outside of the classroom. There is evidence that students are being challenged in the classrooms with the full implementation of an existing program. Carnegie is a math program for secondary students. It challenges students to use higher order thinking to solve real world math problems. Teachers also enjoy using Carnegie because of scheduled site visits from program trainers. Periodically, trainers come to observe teachers teach using the program and then meet with them during teacher's conferences to debrief and guide teachers through instructional strategies. Debriefing sessions and professional development opportunities have been helpful to teachers in acquiring new teaching methods. Carnegie is being implemented in grade levels 6-12! We continue with the vision that we are One District.....ONE Team! It is turning out to be a great year!

*Sergio Jimenez Secondary Principal*
