Item Title: Report on Goal 1 Progress Measure: 1.2—Report on CTE industry certifications including the number of certifications earned and additional certification opportunities

Description:

Industry certifications student data 2017-2018

Recommendation:

Report only

How was the increase determined?
What kind of analysis was done to come up with the increase to 85%?

District Goal/Strategy:

Goal 1 The percentage of graduates who will qualify for community college/university, military, or industry certification will increase from 62% to 85% for graduating class of 2022.

Funding Budget Code and Amount:

Or is it just a factor of decreasing enrollment?

CFO Approval

N/A

This was determined by reviewing data with principals and board members. It is a stretch goal based on data from 2015-16. We hope to increase by 85% in 2022.

Goal: Increase of 10%

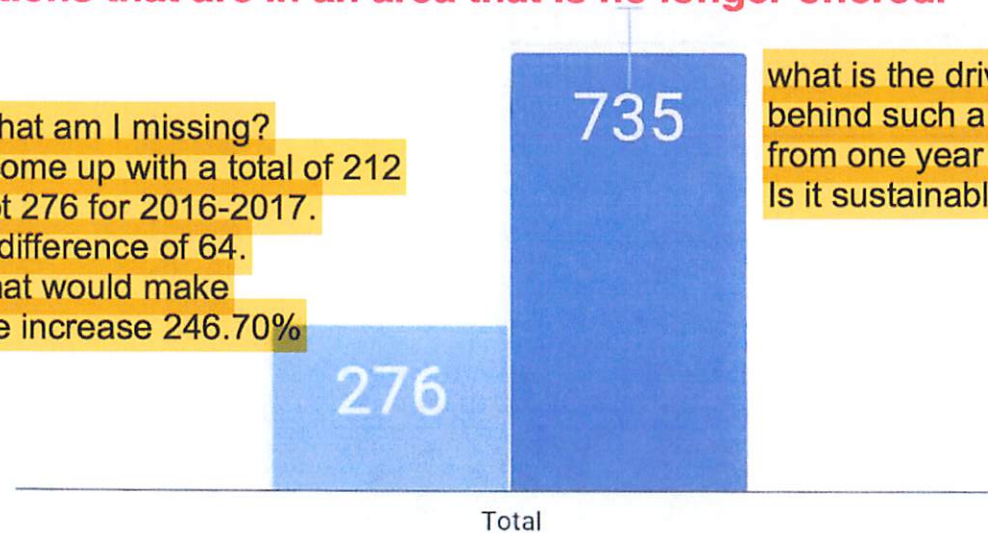

Actual = Increase of 166.3% ... and Still Counting!

Certifications Earned

Some certifications are no longer offered due to industry feedback. The 276 represents total amount earned in 2016-17. 64 represents the # of certifications that are in an area that is no longer offered.

What am I missing?
I come up with a total of 212
not 276 for 2016-2017.
A difference of 64.
That would make
the increase 246.70%

what is the driving factor(s)
behind such a large increase
from one year to the next?
Is it sustainable?

CTE has been revamped. CTE Course Sequences have been restructured for student success.
