Hi Lauren,

Yes, we were able to fund the original robotics grant for the elementary. I put it through again at Christmas time, explained what had happened with Toshiba and it was approved by both the Ed Com and the SBCO board.

I forgot to give you the good news earlier.

So congratulations once again! Please keep me posted on progress with both grants. I am so proud that we have been able to fund both levels of robotics for your students. You are the best!

Elise

Elise,  
Hello. I received a check today and wanted to double check that it is for what I think. Is the \$2,700 check for the elementary robotics? If so, that is amazing and I will make sure we get that going right now.  
Thanks,

Name of Program:		Middle School Intervention		
Brief description of project and how it is consistent with the Mission of SBCO (see SBCO Educational Enrichment Program Guidelines & Criteria)		As an intervention teacher, I work with 80 students throughout the school year who are at risk of failing multiple classes (reading, writing, math, science, social studies). I work with them on remedial reading skills and retention prevention (preventing students from failing and being held back in the same grade). Most of my students struggle with the ability to focus (including a number of students with attention deficit hyperactivity disorder, also known as ADHD, which makes focusing difficult), and many are kinesthetic learners. They learn best through movement and touch. Whether they're standing at their desks rocking backwards in their chairs 		
Program Dates	From	August 2017	To	ongoing
Number of students to be served		80 per year	Age Range	11-14

Enrichment Program Application

<p>From what schools or communities do the students come?</p>	<p>Most students come from the Catalina and Rancho Vistoso communities. We also have a small number of students who are open enrolled from other attendance areas such as Oracle/San Manuel.</p>
<p>How will students be recruited?</p>	<p>Because this grant will help fund seating for an existing classroom, students are not recruited; rather, they are enrolled in the course.</p>
<p>What criteria will be used in selecting students for the program?</p>	<p>Students are placed in intervention classes which will have access to the alternative seating based on standardized test scores, grades, and teacher recommendation.</p>
<p>List your concrete and measurable student enrichment outcomes?</p>	<p>A 2003 study in the American Journal of Occupational Therapy concluded that students with ADHD were better able to focus and showed improved writing when sitting on ball chairs. A May Clinic study in 2007 concurred, showing that students who had the ability to move around were more attentive. .By providing alternate seating choices, I hope to find the same results for my students as those indicated in the research. I hope to see at least a 20% drop in the number of signatures which would show an improvement in both focus and achievement.</p>
<p>What are your criteria for assessing each outcome?</p>	<p>Students currently use a card system to document off task behavior. When students are unfocused, off task, or demonstrating inappropriate classroom behavior, I sign a box on their card. Signed boxes are accompanied by different consequences including warning, lunch detention, and office referral. I will measure the improvement in focus and behavior by comparing the number of times I have to sign their cards after purchasing the materials to the number of times I signed my students' card before purchasing the materials.</p>
<p>Total cost of program</p>	<p>approximately \$2500 <span style="float: right;">+</span></p>
