

Unified K12 School Safety Platform

Prepare | Prevent | Mitigate | Respond | Recover

Dedicated to school safety since 2013, CrisisGo's Safety iResponse provides comprehensive safety solutions empowering your school in the prevention/mitigation, preparation, response, and recovery of any emergency, at any place.

CrisisGo's Safety iResponse platform is fully aligned with the I Love U Guys' Standard Response Protocol (SRP) and the Standard Reunification Method (SRM). Certified by FirstNet to guarantee trusted network connection, we are committed to ensuring successful emergency communication and response.

SAFETY & EMERGENCY COMMUNICATION

- **Alert**

Go beyond standard alerting with the CrisisGo alert system. Send alerts through apps on all devices, wearable panic devices, mounted alarm buttons, security handset panic buttons, smart watches, and AI risk detection.

- **911 & First Responder Escalation**

Instantly escalate critical alerts to 911 PSAPs and local first responders, providing access to situation progress and resources in real-time.

- **Mass Notification**

Empower all stakeholders with flexible mass notification. Receive alerts from classroom computers, mobile apps, digital displays, PA systems, strobes, calls, SMS, emails, and smart watches.

- **Precise Indoor Location**

With CrisisGo's wealth of location-sharing options, send the precise indoor location of any alert generated in the CrisisGo system through the app with GPS, or by the panic system with Bluetooth or Wi-Fi. School administrators, law enforcement, and emergency responders can access the command center to track the alert sender's real-time location on the school floor map, share staff SOS requests with first responders, and communicate with the SOS sender.

- **Reunification**

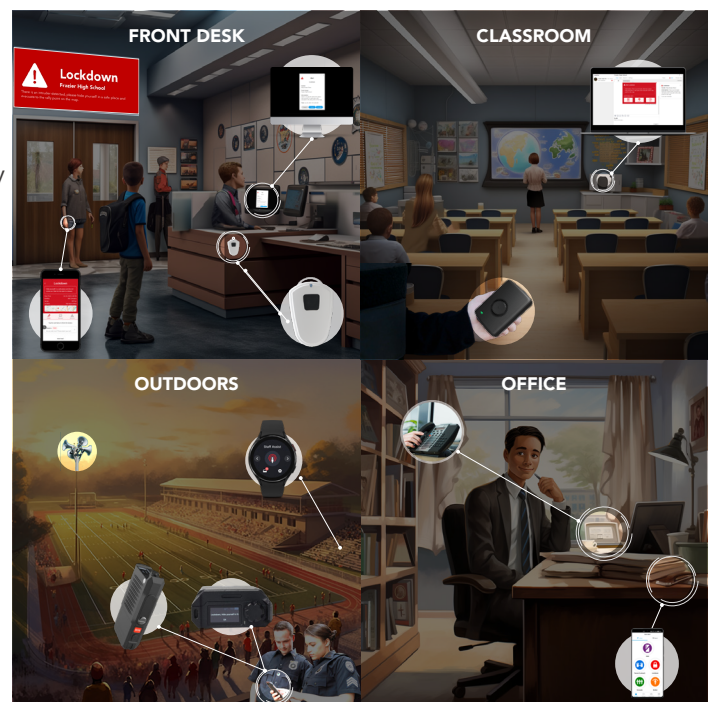

CrisisGo is committed to helping schools recover smoothly and safely after an emergency. The reunification dashboard allows decision-makers to oversee progress and coordinate reunification. We support parent notification with built-in messages and live guidance for parents, as well as digital student release using complete digital records, signatures, and pictures when reunifying students with guardians. CrisisGo reunification coordination is a powerful tool, and fully aligned with the "I Love U Guys" SRM Protocol.

- **Safety Team Communication**

Empower school safety teams with robust emergency communication using push-to-talk devices powered by FirstNet. Seamlessly connect with all staff, district administrators, and first responders.

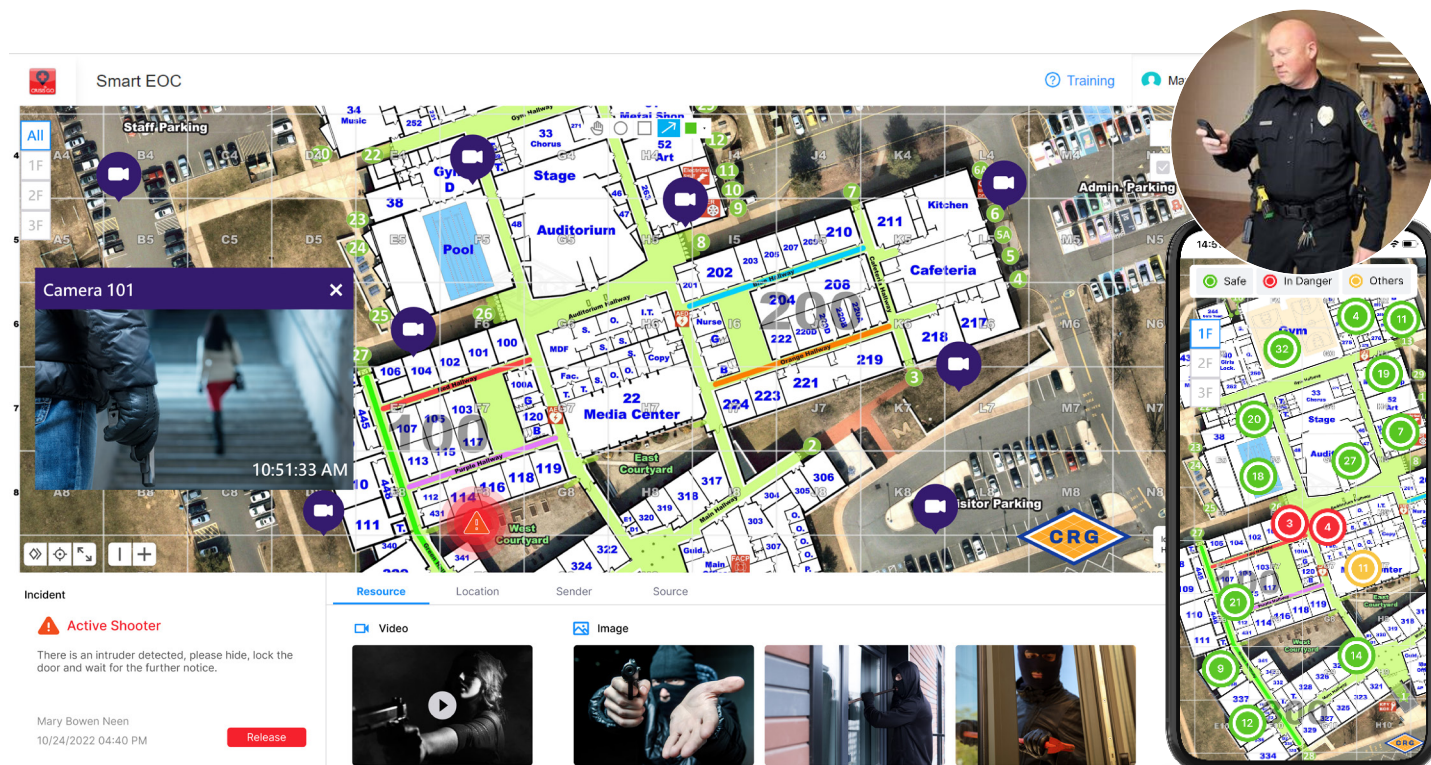

- **Safety Notification**

Notify staff, students, and parents of safety information with our flexible notification system using the app, SMS, or email.

EMERGENCY COMMAND & RESPONSE

With CrisisGo, navigate any emergency with confidence with a fully streamlined emergency response experience. First responder escalation and two-way communication features enable instant and effective communication for decision-makers and responders during any emergency. The accountability tool allows responders to conduct immediate checks and safety status updates for students and staff. With CrisisGo's comprehensive platform, safeguard your school with a robust set of tools designed to adapt to any emergency, at any time.

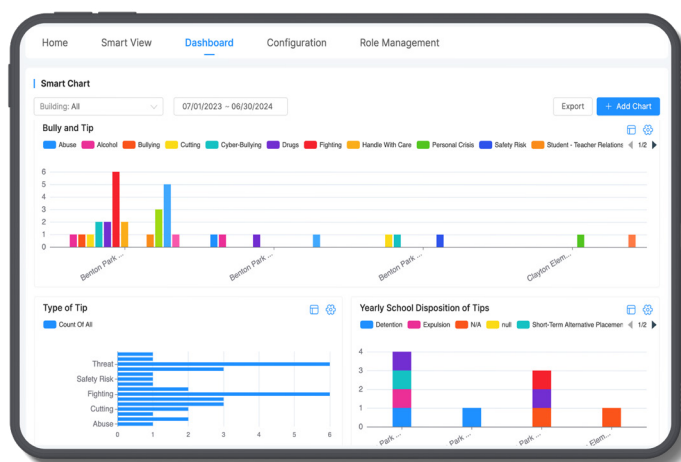

TIPLINE - STREAMLINE THREAT REPORTING & MANAGEMENT

CrisisGo's TipLine supports anonymous tips, empowering communication with tip reporters even as they remain anonymous. With Tipline, notify administrators of high-risk tips, routing, tip sharing, due dates, and compliance reporting.

SAFETY COMPLIANCE & MANAGEMENT

CrisisGo's Risk Management Dashboard consolidates various security technologies in one place. With our easily customizable risk score model built for instant risk identification and assessment, empower superintendents, region administrators, district safety directors, and school principals to make better-informed decisions with an overview of potential risks and hazards gathered from real-time data of the school's security systems.

TipLine Dashboard

EASY SETUP & INTEGRATIONS

With CrisisGo's flexible integration structure, enjoy rapid and effective deployment in any emergency. Supported by over 65 safety and security partners, CrisisGo empowers school districts with a unified view of access control, visitor management, camera footage, AI systems, and much more.

SAFEGUARDING SCHOOLS FOR CONTINUED SUCCESS

Committed to helping schools improve emergency preparedness, CrisisGo offers the drill management feature, a powerful tool complete with drill plans, schedules, performance, review, and compliance reports. Our safety and audit inspection features offer flexible scheduling and management. Schools can use incident management to easily manage all incident and risk reports with immediate response and advanced management. Digital emergency operation plans provide schools with action checklists with mobile and desktop support. Intelligent maps provide a birds-eye view of school safety assets including AEDs, door locks, live feed from surveillance cameras, and more.
