RE: Repair of 2012 Ford F250

At the February 2021 full board meeting I presented the results of putting the 2012 F250 out for bid. At that time all bids were rejected and consideration of replacing the motor and retaining it as a maintenance vehicle were discussed. Due to the lack of budgeted monies to do this with I was asked to research how this could be funded. After speaking with the treasurer, monies would need to be transferred from the fund balance to line item 402-234-981.002 (Maintenance Vehicles). It is my recommendation that this transfer be made and that the vehicle remains with the maintenance dept.
