

## **Board Report 2/11/19**

The greenhouse heater is installed and ready to work.

Matt Holtry asked me about cutting a door entrance in the boy's locker room that leads directly to outside so the team doesn't have to use the lunchroom door. He also asked about cutting a doorway from the coach's office to the storage room. This is an estimate of the costs to have this done:

A-Core: saw cut a 3'x7' - \$500.00 each

Western Specialties: Doors, frames, and hardware - \$850.00 each

We are in the process of replacing some of the old 100-watt halogen lights with 30 watt (3500 lumens) LED lights at the High School and Elementary. There are a total of 21 lights. These new lights are a lot brighter and will save money on the power bills. We are only replacing the bad ones; to do all of them, we would need an additional 14 lights.

We are down a bus driver as of 2/4/19. Jody Rudd is filling in as needed until a driver is found.
