Technology Report
April, 2014

This month the Technology Department worked on the following projects:

- Completed the online testing for TELPAS testing of ESL students.
- Worked with maintenance toward getting the new marquee at OHS mounted and going.
- Worked with Ener-tel completing the annual fire alarm inspection of each building in the district, testing each pull down notifier, each strobe light, each alarm bell, etc.
- Worked to update and clean up all the iPad carts. We also attended a seminar on mobile management, looking at ways to simplify the management of our mobile devices.
- Worked with Ener-Tel on repairing cameras and looking at replacing the outdated systems of DVRs at each campus. Looking at going toward a more central recording structure and adding additional cameras in blind spots.
- Attended two days of training at Region 15 in Office 365. This will be what we migrate to this summer, as Region 15 will no longer be hosting our email.
- Worked at OHS with printing issues in the Heritage building.
- Worked with maintenance on timeclock issues.
- Worked with OHS and Testing Coordinator in getting ESL students access and set up on Rosetta Stone web software.
- Updated portable laptops at OES and installed robotics software for the robotics teacher.
- Visited with OMS Principal about robotics course and ordering software and hardware for that course.
- Began working on FitnessGram, the state mandated report for every student enrolled in physical education courses.
- Assisted OHS Band Director with laptop and projection issues.
- Worked with Ener-Tel discussing security alarm reporting issues and possible solutions.
- We continually support CCCCSD personnel and students with their technology needs.
