Elementary Principal’s Report

Summer School

Summer School this year is ready to go! We have continued enrollments right up to the start, and much excitement generated with some of the newer course offerings. Thank you to all the secretaries, staff and team members for planning, promoting and getting ready for a great experience for our kids. Also - thank you to Mrs. Siefert for working with us hand in hand to offer a seamless care experience for our families this summer when care is needed! Note: July and August Summer School items will be communicated in the next week.

End of Year Events

Kids really enjoyed the end of the school year - every grade was able to have a special field trip or event. From FawndoeRosa to a Boat Trip down the St. Croix, kids experienced a true school year in and out of the classroom. Our concerts, PK and K year ending events, and our carnival were so much fun and so special! And everyone’s shoes and socks were just blown away (and sometimes literally if they weren’t tied tight) during our annual Metric Meet! This year we had many records set for this event, the whole gym wall was covered!

Friendship Fun and Fine Motor Room

The room the student council and RCU helpers made possible is complete! Thank you to Greg, Kyle, Joe, and all the folks who helped the design and build process. It was special to see everyone from kids to adults involved in turning this space into a place so helpful for our OT/PT folks as well as our counseling and main staff in promoting positive activities designed to build friendships and support play, friends, and communication.

Read Right

Mrs. Chell and the team closed out a great first year bringing this life changing program to our students. They are beginning their next adventure, fusing their services with Summer School, and becoming trained as an actual trainer - expanding our ability to bring more services to students next year. In a localized program assessment, Read Right growth outperformed one of our traditionally used intervention programs, even with lower initial achievement levels in students. We are excited for what next year brings.

Academic Achievement

We appreciate our educators incredible efforts this year. It was truly a year full of growth. They helped students perform wonderfully on our assessments and it appears our kids are staged and ready to make a full rebound from the disruption of the years past, if not more, with the new curricular and support programs in place for next year!
