1. Never forget why you became a teacher.
2. Always remember that students come to school to learn and to be loved.
3. Always overestimate your students' potential.
4. Never take things personally.
5. Know that so many of your students can't wait to get to school because of how you make them feel.

Can alternative schools be places where...

- A student's background does not determine how well they do
- Students experience trust, joy and belonging
- Their culture and language are treated as assets and resources
- Their needs are addressed in a thoughtful manner in partnership with their parents and community-based organizations?
- They graduate with a plan and path for the future
