

Review and Discuss Qualifications for  
Architectural/Engineering Design Services for  
Renovations to the Student Services Area on the Main Campus (Title V)

A request for qualifications for architectural/engineering design services for renovations to the student services area on the main campus was sent to 26 vendors and was advertised in the local newspaper. Seven responses were received; one was incomplete and not considered. Staff reviewed the qualifications and conducted in-person interviews with the four most qualified firms based on the written responses. Following discussion, the Committee of the Whole will determine a recommendation to the Board of Regents regarding the firm proposed by staff.
