RE: INVOICE SUPPORT FOR REMAINING 50% OF PHASE 1 (5 COUNTY MMP)

INTRODUCTION

Due to the extended length and variable amounts and intensity of work throughout the timeline, RRS divided the work for the Alpena County Materials Management Planning into four phases. These include pre-planning; planning committee and work program development; planning; and implementation. As the County is ready to proceed with next phases, RRS will refine the tasks and budget to reflect the County's needs with consideration of budget available. Incremental updates will be provided to accompany invoices for the work completed.

PHASE 1 STATUS: COMPLETE

Phase 1 is based on a prescriptive 180-day timetable set by EGLE, initiated by the director's formal "call" for plans. Beginning in January, RRS communicated and coordinated with representatives of adjacent counties to define planning goals and strategy toward a 5-county Materials Management Plan. Working with contracted legal counsel, RRS developed an interlocal agreement that met Alpena County's goal of being appointed as Designated Planning Agency for the 5-county region.

Key Actions in Phase 1: Community engagement to inform stakeholders of the pending planning conversations and identify and formally designate the planning area. Iterative development of a draft interlocal agreement that sets forth the goals, expectations, roles and responsibilities for each county in the multicounty planning area. Presentations and communication with county leadership to answer questions and seek approvals of the interlocal agreement, resolutions appointing Alpena County as DPA

LABOR AND EXPENSE DETAIL FOR COMPLETION OF PHASE 1 :

The labor and expense detail to support the Phase 1 final invoice (remaining 50%) for work performed by RRS is below:

PHASE 1:
