RE: Recommendation for Approval of Bond Projects

As part of our commitment to institutional improvement for student success, I am recommending the approval of the following bond projects.

- Parking lot repairs and Briscoe Building Drive
- Administration and Library Elevator Installation
- Gymnasium HVAC Installation-to include cosmetic upgrades and construction of a new foyer entrance
- Garner Science Ventilation Installation
- Witt Nursing Addition of Skills Lab and Sim Lab

These projects will be a valuable investment in SWTX future and will significantly benefit our faculty, staff, and students. I respectfully request the Board's approval to proceed with the architectural/engineering planning and RFP's for these initiatives.
