

# Action Sheet

**MEETING DATE:** March 29, 2023

**AGENDA ITEM:** Discuss and Consider Ratification of the Supplemental Expenditure to Replace Sewer Lines at Courville Stadium using Bond 2022 Funds

There are two existing sewer lines that run across the stadium field at Courville Stadium. These sewer lines are the original clay pipelines that were installed many years ago. To prevent the potential for future maintenance of these lines following the completion of the new synthetic turf field, it is necessary to replace these lines with an improved PVC product; this will greatly extend the service life of these sewer lines. Zero/Six has recommended the District contract directly with Vortex Services for this work utilizing the Interlocal Purchasing System (TIPS) cooperative contract, Job Order Contract #20110402, and avoid a 17.9% mark-up from the general contractor. The amended quote reflecting the additional cost from Vortex in the amount of \$69,700.00 is attached. This supplemental cost amount to the December 2022 School Board approval is due to the additional City of Galveston requirements that have been instilled from CoG permit document reviews and onsite adjustments as the project has progressed.

**RECOMMENDATION:** I move the board ratify the \$69,700.00 expenditure to Vortex for the replacement of the sewer lines at Courville Stadium, utilizing a TIPS interlocal contract, as presented.
