

Minidoka County School District

# Technology Dept Report

## October 16, 2017

### Classroom Technology

- The laptop carts at Minico High School in the English building have been totally re-furbished. We have swept every room at Minico and found cables plugged in wrong, switches that shouldn't have been installed, and damaged cabling. It also was identified that we need to correctly wire some labs that were put together by adding switches to the room instead of wiring to the wiring closet. It was done wrong in the beginning because of the need of labs and the lack of funds. We also have identified that we need to run some more fiber to separate the network more efficiently. We have just under 2500 devices on the WiFi at Minico High School daily.
- We also have just setup 258 new laptops. Three carts of laptops went to East Minico, three carts went to West Minico, one cart to Rupert Elementary, and 1 cart to Minico High School.

### Department Computers

- We have replaced staff computers in the office for Food Service and Transportation.

### Security/Video

- We are starting to install the locks and the cabling at the District Service Center. With the help of the maintenance department, we are installing and programming all the outside locks and coordinating them with the video security system.

### 911 Location Audit

- With the help of the emergency dispatchers of Minidoka County, we have completed an audit of 911 calls from our current phone system to make sure that each building will receive the correct address when calling 911.

### Work Orders

July	August	September
33 New	203 New	137 New
25 Resolved	138 Resolved	91 Resolved
52 Incomplete	117 Incomplete	163 Incomplete
