

CHILD NUTRITION- FOOD SERVICES-CENTRAL SUPPLY

LYNNE KEENAN

During this past month we have been extremely busy making sure that all the Children going on numerous field trip have nutritious food to take with them. the lack of subs for any of the kitchen help has found both myself and Bonnie working in the kitchens to help out.

We feel very blessed this month here at Central Supply for the addition of a new warehouse man. Tom McKay is a welcome addition. With his help relieving a lot of extra burden on Darren, our warehouse is looking better and better every day. They are getting a better handle on the inventory, getting rid of a lot of outdated items, etc., that we just never had the time or personnel to do before.

A lot of our time is still trying to help the parents with the P-EBT. These phone calls are numerous. The report initially came from our enrollment at the end of last year and went into the state and from there sent to another area where the applications got so mixed up. Very confusing and time consuming.

Regarding the foods, we are trying to get better foods while still having to follow the state guidelines and making sure that our students have all the fresh fruits and vegetables that we can get for them.

For the reimbursement for the month of September we received \$165,416. For the whole district regarding lunches, we had 24,442 students eating during September. In the high school we have lost a lot of students not eating. The highest we have served on any given day is 149 students out of 469+ students, HS only. Some because of the open campus at noon time. We have changed some of our ways of serving hoping that it will speed things up for the students.
