Feedback

This was literally the best conference I have been to in years. The presenters were all very knowledgeable and engaging. I can't wait to share what I learned back on my campus. Thank you!

The keynote speakers were absolutely amazing! Best technology conference I've ever been to. Honestly. Thank you!

It was excellent!!! I will bring many more people next year. Please let us know the date as soon as possible (by December, if possible) so I can allocate and hold money in by budget.

I gain as much if not more from TIA than I do at large national conferences and you're right down the road from me.

Continue having great and inspirational keynote speakers.

Feedback (Delta)

I don't have a solution, but there were a few sessions that were only offered once and at the same time. I had to make some choices. Perhaps the session facilitators could make available any PowerPoint/Resources for use in the event an attendee could not make it to their session in person.

Loved the keynote sessions - would love to see women next time! More practice time in breakout sessions.

Should be able to pay without mailing a check

More seating is needed for keynote speakers.

Many people want to see a hard copy of the school map. I found that the map was only accessible one way. I can't remember exactly how, but many people needing help were not realizing there were multiple ways of accessing information.
