

Minidoka County School District

Food Service Report

June 10, 2016

Board Members,

I was calculating lunch prices for the 16-17 NSLP application, and we will have to increase our pricing to the following:

Elementary - \$1.75

Middle Schools - \$1.85

High Schools - \$2.00

We have to meet a weighted average requirement of \$1.85 (this average is based from the total numbers of paid lunch and the revenue that was generated from October 2015), or the money that we are short of our weighted average would have to come out of general funds. After working different numbers, we will need to go up ten cents at the elementary level and five cents at both the middle schools and high schools to meet the price requirements from the USDA. The application had to be sent in to the state department by the end of May and after talking with Dr. Cox this is the pricing that we went with. We have to do this process every year.

If you have any questions or would like me to show you how these numbers were calculated, I would be glad to go over this process with you at my office.

Thanks,
Russ Taylor
