RE: Innovative Course for 2021-2022

Background: As part of our enhanced service design for learners in resource and other special programs, as well as our general education learners, we would like to offer the Innovative Course "Student to Industry Connection" (PEIMS # N1270154). This course would offer a CTE credit for enrolled learners. As with all innovative courses, our ability to offer it requires board approval.

Recommendation: The CISD Board of Trustees should approve this course offering to allow for additional inclusive CTE opportunities for learners.
