Bargaining Unit Members to be identified

As you do the work in each committee, please think about answering these general questions:

1. What will it look like to our larger public?
2. How will it benefit our students?
3. How will it benefit our school (s)?
4. How will it benefit our families?
5. How will it benefit our taxpayers?
6. Other questions we should remember?

Please review the purpose listed here for each committee and determine if it fits or if you want to change it. As you organize and begin the work of each committee, consider adding additional committee members and /or viewpoints from superintendents, building principals, administrative team members, business and finance office staff, maintenance and transportation department reps, faculty, parents, community members and other professionals or experts.

Each topic also had specific questions found in the FAQs. These will need to be answered and updated as we resolve issues and get information to share with our public stakeholders.
