March Board Report

February and March have been positive months for sure. There is no reason to relist the many projects that are always being addressed day to day but there are projects that we have been working on for months that are close to the final stages;

- The fencing on the high school and middle school campuses.
- The replacement of the East and West doors of the administration building.
- The relocation of the security doors and the installation of the reception window in the new vestibule area.
- The new propane tanks are installed.
- The trash dumpsters were delivered.
- I have set the meter base at the baseball/softball field and TVEC has us on the schedule to install the overhead service.
- The interior lock supplies have been ordered to begin the high school classroom lock replacement.

With the winter weather behind us, we located one pipe burst in the B building of the middle school and we were able to repair that “in-house” with virtually no damage other than to a fire alarm sensor and it has been replaced.

Lately, we have had some challenges with personnel and bus drivers. Fortunately, those that can, have stepped up to help with the driving to get our students to and from school safely and efficiently.
