Academic Intervention Program - The Academic Intervention Program is designed for students who are performing below grade level standards in PreK-7th grade in language arts and math. Students enrolled in the Academic Intervention Program were pre-selected using assessment data. This list was reviewed with the classroom teachers and adjustments were made, if necessary.

Students will be grouped by current grade level with a ratio of 1 teacher to 10 students (PreK will be a 1 to 10 ratio with a shared paraprofessional). Depending on enrollment, grade levels may be combined but the teacher/student ratio will stay at 10. The final determination of classes for the intervention programs will be made at the beginning of May.
