RE: Microgrid Location Options

Last spring, the operations committee reviewed locations to place a microgrid at Euclid Elementary school. In June, the board approved the purchase of a microgrid, the cost of installing the microgrid at Euclid with the assumption that the microgrid would be installed immediately after summer construction concluded. However, with delays to the Renew America Grant, the grant that was going to cover the cost of the microgrid and installation, the microgrid has yet to be ordered and the installation process has not commenced. Because construction is now over at Euclid and construction will soon start at Indian Grove Elementary School, I would like to review the final placement of the microgrid. The committee members will bring their recommendation to the February 11, 2025, Board of Education meeting for approval.
