

AR 6161.4 SECURITY OF INTERNET SYSTEM

System security will be protected through the use of passwords. Failure to adequately protect or update passwords could result in unauthorized access to personal or district files. To protect the integrity of the system, the following guidelines shall be followed:

1. Employees and students shall not reveal their passwords to another individual.
2. Users are not to use a computer that has been logged in under another student's or teacher's name.
3. Any user identified as a security risk or having a history of problems with other computer systems may be denied access to the network.
4. When using the district's network, employees and students must use the email account that has been assigned by the district. Individuals shall not use or access any free Internet-based email service, such as Hotmail or Yahoo, when using the district network.

Safety

To the greatest extent possible, users of the network will be protected from harassment, intimidation or bullying, and from unwanted or unsolicited communication. Any network user who receives unwelcome communications shall immediately bring them to the attention of a teacher or administrator.

Network users shall not reveal personal addresses or telephone numbers to other users on the network.

Complaints

Written complaints regarding student and/or staff access to or use of specific resources available on the Internet will be received, reviewed and acted upon in accordance with the district's policy on challenged instructional materials.
