

Nye County School District

Board Policy

Policy 5557

RESPONSIBLE USE OF ARTIFICIAL INTELLIGENCE

PURPOSE: To establish procedures for the responsible, ethical, and secure use of AI technologies to prepare students for a future-ready workforce while maintaining rigorous standards for data privacy, academic integrity, and human oversight.

RESPONSIBLE OFFICE: Teachers, supervisors, and the Technology & Data Departments

The Board of Trustees recognizes that Artificial Intelligence (AI) and Generative AI (GenAI) are transformative technologies that will fundamentally reshape the educational and professional landscape. In alignment with the Nevada Department of Education's "STELLAR" framework, the District embraces AI not as a replacement for human educators, but as a catalyst to empower student agency, enhance learning, and increase operational efficiency.

It is the policy of the District to authorize the responsible, ethical, and secure use of AI technologies to prepare students for a future-ready workforce while maintaining rigorous standards for data privacy, academic integrity, and human oversight.
