

Quanah ISD

## Technology Report

For the May 2017 School Board

The QISD Technology director responded to 35 calls for assistance since the last board meeting. We had successful online testing with the high school students for end of course testing. I attended the spring tec-sig technology director's conference in Austin at the end of April. We learned about some new features Google will be implementing in Google Classroom and discussed best networking practices. We have recently received an updated internet firewall/filter with new capabilities and I am anticipating a busy summer of network organization.
