

KISD Technology Department

2026 Project Updates

Projects

- Dr. Lori Blaylock Fine Arts Center
- Fiber at Helen Edwards
- Teacher Laptops
- Student Chromebooks
- New Server for CTE Labs
- Computers for CTE Labs

A Professional Foundation for Student Success

Jellyfish Server

- Provides the Fuel (Speed)
- It Maximizes Class Time (Efficiency)
- It Protects the School's Digital Assets (Security)
- It's Teacher-Friendly (Not Just IT-Friendly)

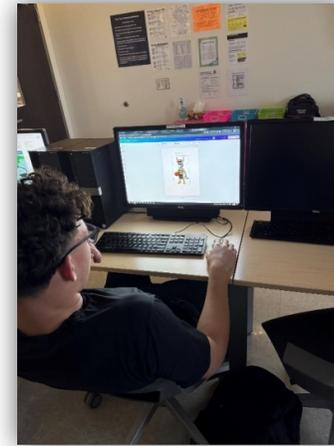

A Professional Foundation for Student Success

High-End Production Computers

- The Workstations are the Engine
- Prevents the Bottleneck
- Maximizing Classroom Time
- Professional Readiness

Ensure Uninterrupted Learning

Remote Support

- We are implementing a new professional remote support tool that ensures technology is an asset to the classroom rather than a disruption.
- **Maximizes Instructional Time:** When a teacher's computer freezes mid-lesson, IT can jump in and fix it instantly from across the district, allowing the lesson to resume without delay.
- **Less Down Time:** Instead of waiting for a technician to drive to a school site, issues are resolved in minutes, keeping the classroom on schedule and reducing faculty stress.
- **Permission-Based Access:** Technicians cannot access a device without explicit permission from the user, ensuring total privacy for our staff and maintaining a secure professional environment.
