

General Education/MST Updates

July 2018

Summer Science Camp has been going well under our new partnership with Community Schools. Camps being held this month include What's the Buzz (K-1), Butterflies and Moths (K-1), and Blastoff Rocketry (5).

We are gearing up for several professional learning opportunities in August. We have purchased iPads, Ozobot kits, and a Family Engineering kit that teachers will be trained how to use and can check out from our center for future MakerSpace events that they wish to hold at their schools. We will also be hosting a Google Bootcamp, a Math Recovery session for AVMR graduates, and a New Teacher Academy next month.

The U.P. Administrator Academy will be held on July 31st and August 1st at the Terrace Bay Hotel in Gladstone. Sessions include a legislative panel with elected representatives, Thrun Law updates, keynote Vern Hazard, and shorter sessions on trauma, early literacy, and much more!
