Three Rivers School District

Inspections / Training

Inspections

All of the schools are looking good, our custodians are hard working and dedicated to providing the cleanest learning environment as possible for our students and staff.

Schools with Outstanding Inspections this month.

- Illinois Valley High School
- Lorna Byrne Middle School
- Evergreen Elementary
- Fort Vannoy Elementary

Thank you and keep up the great work!

Custodial Training

Custodial training was conducted on December 3rd at the District Office. We had a great turn out. In attendance were 30 of our 32 full time custodians and 8 substitute custodians.

We covered a wide range of topics.

- Monthly Reports
- Monthly Inspection Review
- Equipment care and Maintenance
- OHSA and Safety

TRSD Custodians taking test at end of class

Quantum Leap Innovation Training

The main topic was the induction of the ARAMARK Quantum Leap Innovation Cleaning Systems, which consists of the following innovations in cleaning:

- SpaceCare QL
- FloorCare QL
- CarpetCare QL

Each QL cleaning system is developed with a focus on innovation and the state of art technology in four areas- product, process, equipment and training.

Our training focused on the first of the QL cleaning systems **SpaceCare QL**

TRSD Custodians in “Class”

SpaceCare QL

Benefits of SpaceCare QL Include:

- Improved Quality
- Higher Productivity
- Increase Asset Preservation for Our Facilities
- Reduced Costs
- Simplified Training
- 70% Reduction in Consumption of Cleaning Products
- Standardized Cleaning Across the District.
- Enhance the Skill Level and Job Satisfaction of the Custodial Crews

SpaceCare QL

Improved Quality/Higher Productivity

- We are doing this by the use of Micro Fiber technology.
- The use of micro-fiber rags and pad increase the quality of cleaning by effectively removing the dirt from the room, which contributes greatly to our cleaning for health.
- This has an 18 to 28% labor savings over the Mop and Bucket process.
- It also provides a reduction in water consumption compared to mop and bucket, 16 gallons to 1.

We have reduced the amount of cleaning product usage and handling with automatic dispensers, along with reducing the number of daily cleaning products down to three.

SpaceCare QL

Standardized Cleaning Across the District

- Custodians were trained on the setting up of their custodial carts. Each cart will contain the proper and readily available tools so they can clean effectively.
- Training in the proper cleaning steps for Offices, Classrooms and Restrooms was conducted.
- The new micro-fiber high duster and trowel was introduced.
- Refresher training in proper use of the daily cleaning products.
