

Students

Administering Medication

The purpose of this policy is for the Board of Education (Board) to determine who shall administer medications in a school and the circumstances under which self-administration of medication by students shall be permitted.

The Board of Education allows students to self-administer medication and school personnel to administer medication to students in accordance with the established procedures, and applicable state regulations, sections [10-212a-1](#) through [10-212a-10](#) inclusive. In order to provide immunity afforded to school personnel who administer medication, the Board of Education, with the advice and approval of the School Medical Advisor and the school nurse supervisor, shall review and/or revise this policy and regulation biennially concerning the administration of medications to District students by a nurse, or in the absence of a nurse, by qualified personnel for schools. The District's School Medical Advisor (or other qualified physician) shall approve this policy, its regulations and any changes prior to adoption by the Board.

Definitions

Administration of medication means any one of the following activities: handling, storing, preparing or pouring of medication; conveying it to the student according to the medication order; observing the student inhale, apply, swallow, or self-inject the medication, when applicable; documenting that the medication was administered; and counting remaining doses to verify proper administration and use of the medication.

Error means:

- (1) the failure to do any of the following as ordered:
 - (a) administer a medication to a student;
 - (b) administer medication within the time designated by the prescribing physician;
 - (c) administer the specific medication prescribed for a student;
 - (d) administer the correct dosage of medication;
 - (e) administer medication by the proper route; and/or
 - (f) administer the medication according to generally accepted standards of practice; or
- (2) the administration of medication to a student which is not ordered by an authorized prescriber, or which is not authorized in writing by the parent or guardian of such student.

Medication means any medicinal preparation including over-the-counter, prescription and controlled drugs, as defined in Connecticut General Statutes Section [21a-240](#). This definition includes Aspirin, Ibuprofen or Aspirin substitutes containing Acetaminophen.

Medication order means the written direction by an authorized prescriber for the administration of medication to a student which shall include the name of the student, the name and generic name of the medication, the dosage of the medication, the route of administration, the time of administration, the frequency of administration, the indications for medication, any potential side effects including overdose or missed dose of

the medication, the start and termination dates not to exceed a 12-month period, and the written signature of the prescriber.

Nurse means an advanced practice registered nurse, a registered nurse or a practical nurse licensed in Connecticut in accordance with Chapter 378 of the Connecticut General Statutes.

Qualified personnel for schools means (a) a full-time employee who meets the local or regional Board of Education requirements as a principal, teacher, occupational therapist or physical therapist and has been trained in the administration of medication in accordance with Section [10-212a-3](#) of the State regulations; (b) a paraprofessional who has been trained in the administration of medication pursuant to Section [10-212a-9](#) of the State regulations.

General Policies on Administration of Medication

A child with diabetes may test his/her own blood glucose level per the written order of a physician or advanced practice registered nurse (APRN) stating the need and the capacity of such child to conduct self-testing. The Board may request written acknowledgement from the parent/guardian, and have the school nurse approve the student's ability to test his/her blood glucose independently, but may not deny the student's right to test if the school has the written order from the physician or APRN. Such self-testing shall be pursuant to guidelines promulgated by the Commissioner of Education.

A child diagnosed with asthma or an allergic condition, pursuant to State Board of Education regulations, may carry an inhaler or an Epipen or similar device in the school at all times if he/she is under the care of a physician, physician assistant, or advanced practice registered nurse (APRN) and such practitioner certifies in writing to the Board of Education that the child needs to keep an asthmatic inhaler or Epipen at all times to ensure prompt treatment of the child's asthma or allergic condition and protect the child against serious harm or death. A written authorization of the parent/guardian is also required.

A school nurse may only administer medication to a student when the school has the following three documents: (1) the written order of an authorized prescriber (physician, dentist, optometrist, an advanced practice registered nurse, or a physician assistant); (2) the written authorization of a parent or guardian of such child or eligible student; and (3) the written permission of the parent/guardian for the exchange of information between the prescriber and the school nurse necessary to ensure the safe administration of such medication.

In the absence of a school nurse or any other nurse licensed pursuant to the provisions of Chapter 378, only qualified personnel for schools who have been properly trained may administer medications to students as delegated by the school nurse upon approval of the School Medical Advisor.

Medication with a cartridge injector may be administered by qualified personnel for schools only to a student with a medically diagnosed allergic condition which may require prompt treatment to protect the student against serious harm or death. Qualified personnel for schools, as defined, may administer oral, topical, intranasal, or inhalant medication in the absence of a licensed nurse. Investigational drugs or research or study medications may not be administered by qualified personnel for schools.

In compliance with all applicable state statutes and regulations, parents/guardians may administer medications to their own children on school grounds.

Administration of Anti-Epileptic Medications to Students

With the written authorization of a student's parent/guardian, and pursuant to the written order of a physician, a school nurse (and a school medical advisor, if any), shall select and provide general supervision to a qualified school employee, who voluntarily agrees to serve as a qualified school employee, to administer anti-epileptic medication, including by rectal syringe, to a specific student with a medically diagnosed epileptic condition that requires prompt treatment in accordance with the student's individual seizure action plan. Such authorization is

limited to situations when the school nurse is absent or unavailable. No qualified school employee shall administer such medication unless he/she annually completes the training program developed by the State Department of Education, in consultation with the School Nurse Advisory Council.

In addition, the school nurse (and school medical advisor, if any), shall attest, in writing, that such qualified school employee has completed the required training. The qualified school employee shall also receive monthly reviews by the school nurse to confirm his/her competency to administer anti-epileptic medication. For purposes of the administration of anti-epileptic medication, a "qualified school employee" means a principal, teacher, licensed athletic trainer, licensed physical or occupational therapist employed by the District, coach or school paraprofessional.

Administration of Medication by Paraprofessionals

A specific paraprofessional, through a plan approved by a school nurse supervisor and School Medical Advisor, may administer medications including medications administered with a cartridge injector, to a specific student with a medically diagnosed allergic condition that may require prompt treatment in order to protect the student against serious harm or death pursuant to Section [10-212a-9](#) of the Regulations of Connecticut State Agencies and as described in the administrative regulations. The approved plan also requires the written authorization of the student's parent/guardian and pursuant to the written order from the student's authorized prescriber licensed to prescribe medication.

School Bus Drivers Training

By June 30, 2019, school transportation carriers must provide training to all school bus drivers, including instruction on (1) identifying the signs and symptoms of anaphylaxis, (2) administering epinephrine by a cartridge injector (“EpiPen”), (3) notifying emergency personnel, and (4) reporting an incident involving a student’s life-threatening allergic reaction. Such training can be completed online, provided the online module fulfills legislative requirements.

Beginning July 1, 2019, each carrier must provide the training to school bus drivers (1) following the issuance or renewal of a public passenger endorsement to operate a school bus for carrier employees, and (2) upon the hiring of a school bus driver who is not employed by such carrier (e.g., subcontractor), except a driver who received the training after the most recent issuance or renewal of his or her endorsement is not required to repeat it.

Policy revised: April 26, 2016

WOODBRIIDGE SCHOOL DISTRICT

Woodbridge, Connecticut

Students

Administering Medication to Students

Regular School Day

The Board of Education (Board) allows students to self-administer medication and qualified personnel for schools to administer medication to students in accordance with the following established procedures. These procedures shall be reviewed and/or revised and approved by the School Medical Advisor, the school nurse and the Board of Education. The District's School Medical Advisor (or other qualified physician) will approve this policy, its regulations and any changes prior to submission to the Board of Education for its approval.

The administration of medication includes the activities of handling, storing, preparing or pouring of medication, conveying it to the student according to the medication order, observing the student inhale, apply, swallow, or self-inject the medication, when applicable; documenting that the medication was administered; and counting remaining doses to verify proper administration and use of the medication.

A student who is required to receive medication or wants to take aspirin, ibuprofen, or an aspirin substitute containing acetaminophen during school hours must provide:

1. The authorized prescriber's (physician, dentist, optometrist, advanced practice registered nurse, or physician assistant; and a podiatrist in the case of interscholastic or intramural athletic events) orders for medication or aspirin, ibuprofen, or an aspirin substitute containing acetaminophen on a school district form which specifies the student's name, condition for which the drug is being administered, name of drug and method of administration and dosage of drug. For students receiving medicine the time of administration and duration of the order, side effects to be observed (if any) and management of such effects, and student allergies to food and/or medicine is also required on the form. This medical order must be renewed yearly if a student is to be administered medication by school personnel.
2. Written authorization from the parent or guardian allowing school personnel to administer said medication. This authorization shall be renewed yearly and shall include parental consent for school personnel to destroy said medication if not repossessed by the parent or guardian within a seven (7) day period of notification by school authorities.
3. Written permission of the parent or guardian for the exchange of information between the authorized prescriber and the school nurse to ensure the safe administration of such medication.
4. Medication with its original label from the pharmacy or manufacturer.

Students who are able to self-administer medication may do so provided:

1. An authorized prescriber provides a written order including the recommendation for self-administration of said medication.
2. There is written authorization for self-administration of medication from the student's parent or guardian.
3. The school nurse has evaluated the situation and deemed it to be safe and appropriate; has documented this on the student's cumulative health record, and has developed a plan for general supervision.

4. The student and school nurse have developed a plan for reporting and supervision of self-administration and notification of teachers.
5. The principal and appropriate teachers are informed that the student is self-administering prescribed medication.
6. Such medication shall be transported to school by the student and maintained under the student's control in accordance with the District's policy on self-medication by students and individual student plans.

Further, the school nurse shall assess the student's competency for self-administration in the school setting and deem it to be safe and appropriate, including that a student:

1. is capable of identifying and selecting the appropriate medication by size, color, amount, or other label identification;
2. knows the frequency and time of day for which the medication is ordered;
3. can identify the presenting symptoms that require medication;
4. administers the medication properly;
5. maintains safe control of the medication at all times;
6. seeks adult supervision whenever warranted; and
7. cooperates with the established medication plan.

In the case of inhalers for asthma and cartridge injectors for medically-diagnosed allergies, the school nurse's review of a student's competency to self-administer inhalers for asthma and cartridge injectors for medically-diagnosed allergies in the school setting shall not be used to prevent a student from retaining and self-administering inhalers for asthma and cartridge injectors for medically-diagnosed allergies. Students may self-administer such medications only with the written authorization of an authorized prescriber and written authorization from the student's parent or guardian or eligible student.

A child with diabetes may test his/her own blood glucose level per the written order of a physician or advanced practice nurse stating the need and the capacity of such child to conduct self-testing. The Board may request written acknowledgement from the parent/guardian, and have the school nurse approve the student's ability to test his/her blood glucose independently but may not deny the student's right to test if the school has the written order from the physician or APRN. Such self-testing shall be pursuant to guidelines promulgated by the Commissioner of Education.

The school nurse is responsible for:

1. Reviewing the medication order and parental authorizations;
2. Developing an appropriate plan for self-administration;
3. Documenting the medication plan in the student's or participant's health record;
4. Informing qualified personnel for schools and other staff regarding the student's self-administration of prescribed medication;

5. Notifying physician of health care provider and parent or guardian if student is unable to demonstrate competence; and

6. Documentation of notice to both the authorized prescriber and parent/guardian of inability to demonstrate competence and outcome.

Medication may be administered by an advanced practice nurse, registered nurse, or a practical nurse licensed pursuant to the provisions of Chapter 378, qualified personnel for schools (principals and teachers) trained in the administration of medication. They shall not be held liable for any personal injuries which may result from acts or omissions constituting ordinary negligence.

Medication will be administered according to the following procedures:

1. The school nurse will develop a medication administration plan for each student before medication may be administered by any staff member. The school nurse will also review regularly all documentation pertaining to the administration of medication for students.

2. The qualified personnel for schools approved by the School Medical Advisor and school nurse will be formally trained by the school nurse or School Medical Advisor prior to administering medication. The school nurse, acting as designee and under the direction of the School Medical Advisor, will annually instruct such staff members in the administration of medication. The training shall include, but not be limited to:

A. The generic principles of safe administration of medications.

B. Review of state statute and school regulations regarding administration of medication by school personnel.

C. Procedural aspects of the administration of medication, including the safe handling and storage of medication, and documentation.

D. Specific information related to each student's medication and each student's medication plan including the name and generic name of the medication, indications for medication, dosage, routes, time and frequency of administration, therapeutic effects of the medication, potential side effects, overdose or missed dose of the medication, and when to implement emergency interventions.

3. A list of qualified personnel successfully trained and approved to administer medication along with documentation of the annual update of trainees shall be available in the Health Office. All such individuals including school nurses and nurse practitioners must have also satisfactorily passed the criminal background check. The documentation shall include the dates of general and student-specific training, the content of the training, individuals who have successfully completed general and student-specific administration of medication training for the current school year, and names and credentials of the nurse or School Medical Advisor trainer or trainers.

4. A current list of those authorized to give medication shall be maintained in the school.

A specific paraprofessional, in the absence of a school nurse, may only administer medications to a specific student in order to protect that student from harm or death due to a medically diagnosed allergic condition according to the following:

1. only with the approval of the School Medical Advisor and school nurse, in conjunction with the school nurse supervisor, and under the supervision of the school nurse;

2. with a proper medication authorization from the authorized prescriber in conformity with Connecticut General Statute [10-212a](#);
3. with parental/guardian permission to administer the medication at school;
4. only medication necessary for prompt treatment of an allergic reaction, including, but not limited to, a cartridge injector, and
5. the paraprofessional shall have received proper training and supervision from the school nurse as detailed in Section [10-212a-3](#) and Section [10-212a-7](#) of the Regulations of Connecticut State Agencies.

Note: The use of a paraprofessional to administer medications, as described above, is not mandated by law or regulation. Such use is subject to Board of Education approval.

Handling and Storage of Medications

All medication, except those approved for keeping by students for self-medication, must be delivered by the parent or other responsible adult and shall be received by the nurse assigned to the school or, in the absence of such nurse, by other qualified personnel for schools trained in the administration of medication and assigned to the school. The school nurse must:

- A. Examine on site any new medication, medication order and parent/guardian authorization to insure that it shall be properly labeled with dates, name of student, medication name, dosage and physician's name, and that the medication order and permission form are complete and appropriate.
- B. Develop an administration of medication plan for the student before any medication is given by qualified personnel for schools.
- C. Review all medication refills with the medication order and parent/guardian written authorization prior to the administration of medication.
- D. Except as indicated by a student's emergency care plan, emergency medications shall be stored in an unlocked, clearly labeled and readily accessible cabinet or container during school hours under the supervision of the nurse or the principal or principal's designee trained in the administration of medication.
- E. Emergency medications shall be locked beyond the regular school day or program hours except as otherwise determined by a student emergency care plan.
- F. Record on the Student's Individual Medication Record the date the medication is delivered and the amount of medication received.
- G. Store medication requiring refrigeration in a refrigerator at no less than 36 degrees Fahrenheit and no more than 46 degrees Fahrenheit. The refrigerator shall be located in a health office maintained for health service purposes with limited access. Non-controlled medications may be stored directly on the shelf of the refrigerator with no further protection needed. Controlled medications shall be stored in a locked box affixed to the refrigerator shelf.
- H. All other medication, except those approved for keeping by students for self-medication shall be kept in a designated locked container, cabinet or closet used exclusively for the storage of medication. Controlled substances shall be contained in a separate, secure substantially constructed metal or wood cabinet and locked at all times. At least two sets of keys for the medication containers or cabinets shall be maintained for the school

building or before- or after-school programs and school. The school nurse shall maintain one set of keys. The additional set shall be under the direct control of the Principal. If necessary, the Program Director or lead teacher trained in the administration of medication shall also have a set of keys.

No more than a three month supply of a medication for a student shall be stored at the school. All medications, prescriptions and non-prescription, shall be delivered and stored in their original containers and in such a manner as to render them safe and effective. No medication for a student shall be stored at a school without a current written order from an authorized prescriber.

Access to all stored medications shall be limited to persons authorized to administer medications. Each school or before- and after-school program and school readiness program shall maintain a current list of those persons authorized to administer medications.

Destruction/Disposal of Medication

At the end of the school year or whenever a student's medication is discontinued by the authorized prescriber, the parent or guardian is to be contacted and requested to repossess the unused medication within a seven (7) school day period. If the parent/guardian does not comply with this request, all medication (non-controlled drugs) is to be destroyed by the school nurse in the presence of at least one witness (school physician, principal, teacher) according to the following procedures:

1. Medication will be destroyed in a non-recoverable fashion. (Procedure below recommended by Connecticut Department of Environmental Protection, Office of Pollution Prevention.)

A. Keep the medication in its original container.

- To protect privacy and discourage misuse of the prescription, cross out the patient's name with a permanent marker or duct tape or remove the label. (Chemotherapy drugs may require special handling. Work with your healthcare provider on proper disposal options for this type of medication.)

B. Modify the medications to discourage consumption.

- For solid medications: such as pills or capsules: add a small amount of water to at least partially dissolve them.

- For liquid medications: add enough table salt, flour, charcoal, or nontoxic powdered spice, such as turmeric or mustard to make a pungent, unsightly mixture that discourages anyone from eating it.

- For blister packs: wrap the blister packages containing pills in multiple layers of duct or other opaque tape.

C. Seal and conceal.

- Tape the medication container lid shut with packing or duct tape.

- Place it inside a non-transparent bag or container such as an empty yogurt or margarine tub to ensure that the contents cannot be seen.

- Do not conceal medicines in food products because animals could inadvertently consume them.

D. Discard the container in your trash can.

E. Schools that want to dispose of controlled substances should call the Drug Control Division of the CT Department of Consumer Protection for assistance at 860-713-6055.

2. The following information is to be charted on the student's health folder and signed by the school nurse and witness:

A. Date of destruction.

B. Time of destruction.

C. Name, strength, form and quantity of medication destroyed.

D. Manner of destruction of medication.

3. Controlled substances shall not be destroyed by the school nurse. Controlled substances shall be destroyed pursuant to Section [21a-262-3](#) of the Regulations of the Connecticut State Agencies. In the event that any controlled substance remains unclaimed, the school nurse or Supervisor of Nursing shall contact the Connecticut Commissioner of Consumer Protection to arrange for proper disposition. Destruction may also be conducted by a Connecticut licensed pharmacist in the presence of another pharmacist acting as a witness.

4. Any accidental destruction or loss of controlled drugs must be verified in the presence of a second person, including confirmation of the presence or absence of residue and jointly documented on the student medication administration record and on a medication error form pursuant to Connecticut General Statute [10-212a\(b\)](#). If no residue is present notification must be made to the Department of Consumer Protection (DEP) pursuant to Section [21a-262-3](#) of the Regulations of Connecticut State Agencies.

5. The completed medication administration record for non-controlled medications may be destroyed in accordance with Section M8 of the Connecticut Municipality Retention Schedule, provided it is superseded by a summary on the student health record.

Documentation and Record Keeping

Record keeping of medication administration shall either be in ink and shall not be altered or shall be recorded electronically, in a record that cannot be altered, on the individual student's medication record form which, along with the parental authorization form and the authorized prescriber's order, becomes part of the student's permanent record. Records shall be made available to the Connecticut State Department of Education upon request, for review until destroyed pursuant to C.G.S. [11-8a](#) and C.G.S. [10-212a\(b\)](#) for controlled medications.

Each school readiness or before- and after-school program where medications are administered shall maintain an individual medication administration record for each student who receives medication during regular school or program hours. A medication administration record shall include the:

A. Name of the student;

B. Name of medication;

C. Dosage of medication;

D. Route of administration;

E. Frequency of administration;

- F. Name of the authorized prescriber, or in the case of aspirin, ibuprofen, or an aspirin substitute containing acetaminophen being given to a student, the name of the parent or guardian requesting the medication to be given;
- G. Dates for initiating and terminating the administration of the medication, including extended year programs;
- H. Quantity received which shall be verified by the adult delivering the medication;
- I. Student allergies to food and/or medicine;
- J. Date and time of administration or omission including reason for omission;
- K. Dose or amount of drug administered;
- L. Full written or electronic signature of the nurse or qualified personnel for schools administering the medication; and
- M. For controlled medications, a medication count which shall be conducted and documented at least once a week and co-signed by the assigned nurse and a witness.

The completed medication administration record for controlled medications shall be maintained in the same manner as the non-controlled medications. In addition, a separate medication administration record needs to be maintained in the school for three years, pursuant to Connecticut General Statute [10-212a\(b\)](#).

The written order of the authorized prescriber, the written authorization of the parent or guardian to administer the medication and the written parental/guardian permission for the exchange of information by the prescriber and school nurse to ensure the safe administration of such medication shall be filed in the student's cumulative health record or, for before- and after-school programs and school readiness programs, in the child's program record.

Record of the medication administered shall be entered in ink on an individual student medication record form and filed in the student's cumulative health folder. If the student is absent, it shall be so recorded. If an error is made in recording, a single line shall be run through the error and initialed.

An authorized prescriber's verbal order, including a telephone order, for a change in any medication may be received only by a school nurse. Such verbal order must be followed by a written order within three (3) school days.

An error in the administration of medication shall be reported to the school nurse who will initiate appropriate action and documentation in a student incident report and on his/her cumulative record.

Untoward reactions to medication shall be reported to the school nurse, the parent, and the student's physician.

Records of controlled substances shall be entered in the same manner as other medications with the following additions:

- A. The amount of controlled drug shall be counted and recorded on the individual student medication record form after each dose given.
- B. A true copy (carbon or NCR) of the forms shall be retained by the school for 3 years and the original filed in the student's permanent health record.

C. Loss, theft or destruction of controlled substances shall be immediately, upon discovery, reported to the Supervisor of Nursing Services who will contact the Connecticut Commissioner of Consumer Protection.

In the absence of a licensed nurse, only qualified personnel for schools who have been properly trained may administer medication to students. Qualified personnel for schools may administer oral, topical, or inhalant medications. Medications with a cartridge injector(s) may be administered by qualified personnel only to a student with a medically diagnosed allergic condition which may require prompt treatment to protect the student against serious harm or death.

Investigational drugs may not be administered by qualified personnel for schools.

In the case of the administration of a medication with a cartridge injector in an after-school readiness program or child-care program, such administration shall be reported to the school nurse no later than the next school day.

Medication Errors

An error in the administration of medication shall be reported immediately to the school nurse, the school nurse supervisor, the parent/guardian, and the authorized prescriber, verbally and followed by a written statement to all parties within one (1) school day.

A medication error includes any failure to administer medication as prescribed for a particular student, including failure to administer the medication:

- Within the appropriate timeframe.
- In the correct dosage.
- In accordance with accepted practice.
- To the correct student.

In the event of a medication error, the school nurse shall notify the parent or guardian. The nurse shall document the effort to reach the parent or guardian. If there is a question of potential harm to the student and medical treatment may be required, the nurse and/or building administrator shall also notify the student's authorized prescriber or the School Medical Advisor. In a severe emergency, 911 should be called. Contact the Poison Control Center as deemed necessary.

Any errors in the administration of a medication shall be documented by the nurse in the student's cumulative health record or, for before- and after-school programs and school readiness programs, in the child's program record. A written report shall also be made using a medication error form authorized by the Board of Education. The report must include any corrective action taken.

In case of an anaphylactic reaction or the risk of such reaction, a school nurse may administer emergency oral and/or injectable medication to any student in need thereof on the school grounds, in the school building, or at a school function according to the standing order of the School Medical Advisor or the student's health care provider.

Administration of Emergency Medication under Connecticut General Statute [10-212a](#)

In the absence of a licensed nurse, qualified personnel for schools may give emergency medication orally or by injection to students with a medically diagnosed allergic condition which would require such prompt treatment

to protect the child from serious harm or death so long as the administrator or teacher has completed training in administration or such medication.

Whenever a student has an untoward reaction to a medication, resolution of the reaction to protect the student's health and safety shall be the foremost priority. The school nurse and the authorized prescriber shall be notified immediately, or as soon as possible in light of any emergency medical care that must be given to the student.

In the event of a medication emergency, the following will be readily available:

- A. The use of the 911 emergency response system;
- B. The contact of a local poison information center;
- C. The physician, clinic or emergency room to be contacted in such an emergency;
- D. The name of the person responsible for the decision-making in the absence of the school nurse;
- E. The application by properly trained and/or certified personnel of appropriate emergency medical care techniques, such as cardio-pulmonary resuscitation;
- F. Administration of emergency medication in accordance with policy #[5141.21](#) and this administrative regulation; and
- G. Transporting the student to the nearest available emergency medical care facility that is capable of responding to a medication emergency.

As soon as possible, in light of the circumstances, the Principal shall be notified of the medication emergency. The Principal shall immediately thereafter contact the Superintendent or the Superintendent's designee.

The school nurse is responsible for notifying the parent or guardian, advising of the existence and nature of the medication emergency and all steps taken or being taken to resolve the emergency and protect the health and safety of the student, including contact with the authorized prescriber and/or any other medical action(s) that are being or have been taken.

Supervision

The school nurse is responsible for general supervision of administration of medications in the school(s) to which that nurse is assigned. The school nurse's duty of general supervision includes, but is not limited to the following:

- 1. Availability on a regularly scheduled basis to:
 - a. review orders or changes in orders, and communicate these to personnel designated to administer medication for appropriate follow-up;
 - b. set up a plan and schedule to ensure medications are given;
 - c. provide training to qualified personnel for schools and other licensed nursing in the administration of medications, and assess that the qualified personnel for schools are competent to administer medications;
 - d. support and assist other licensed nursing personnel and qualified personnel for schools to prepare for and implement their responsibilities related to the administration of specific medications during school hours; and,

- e. provides consultation by telephone or other means of telecommunications. (In the absence of the school nurse, an authorized prescriber or other nurse may provide this consultation.)
2. In addition, the school nurse shall be responsible for:
- a. implementing policies and procedures regarding the receipt, storage, and administration of medications;
 - b. reviewing, on a monthly basis, all documentation pertaining to the administration of medications for students;
 - c. observing the competency to administer medication by qualified personnel for schools; and
 - d. conducting periodic reviews, as needed, with licensed nursing personnel and qualified personnel for schools, regarding the needs of any student receiving medication.

Before- and After-School Programs and School Readiness Programs

Directors, or their designees, who may include lead teachers or school administrators, who have been properly trained, may administer medications to students as delegated by the school nurse or other registered nurse, in school readiness programs and before- and after-school programs that are child care programs. (Such programs must either be District-administered or administered by a municipality exempt from licensure by the Department of Public Health and are located in a District public school). Medicine may be administered pursuant to the Regulations of Connecticut State Agencies, Section [10-212a-10](#), to children enrolled in these programs.

Administration of medications shall be provided only when it is medically necessary for program participants to access the program and maintain their health status while attending the program. Investigational drugs or research or study medications may not be administered by Directors or their designees, lead teachers or school administrators. Properly trained Directors, Directors' designees, lead teachers or school administrators may administer medications to students as delegated by the school nurse or other registered nurse. They may administer oral, topical, intranasal, or inhalant medications. No medication shall be administered without the written order of an authorized prescriber and the written approval of the parent/guardian.

A child attending any before- or after-school program, as defined in policy [#5141.21](#), upon the request and with the written authorization of the child's parent/guardian and pursuant to the written order from the student's authorized prescriber, will be provided medication and supervised by the District staff member (Director or designee, lead teacher, school administrator) trained to administer medication with a cartridge injector. Such administration shall be to a particular student who is medically diagnosed with an allergy that may require prompt treatment to avoid serious harm or death.

The selected staff member shall be trained in the use of a cartridge injector by either a licensed physician, physician's assistant, advanced practice registered nurse or registered nurse.

The administration has determined, in cooperation with the School Medical Advisor and school nurse supervisor, the level of nursing services that is/is not required on site based on the needs of the program and its participants.

Students in the school readiness and before- and after-school programs may self-administer medication according to the student's individual health plan and only with the written order of an authorized prescriber, written authorization of the child's parent or guardian, written approval of the school nurse. (Note: It is a local decision whether to allow self-medication in these programs.)

The nurse shall evaluate the situation and determine whether self-administration is appropriate and safe and shall develop a plan for general supervision of such self-medication. The written permission of the parent or guardian for the exchange of information between the prescriber and the school nurse is required in order to ensure the safe administration of such medication. Any error in the administration of medication shall be reported immediately to the school nurse, the parents and the authorized prescriber.

In case of an anaphylactic reaction or the risk of such reaction a school nurse may administer emergency oral and/or injectable medication to any child in need thereof on school grounds, or in the school building, according to order of the School Medical Advisor or the child's health care provider. Qualified personnel may administer emergency oral and/or injectable medication to any child in need thereof on school grounds of in the school building according to the order of the child's health care provider. Local poison control center information shall be readily available at the sites of these programs.

In the event of a medical emergency, the following will be readily available: (1) local poison information center contact information; (2) the physician, clinic or emergency room to be contacted in such an emergency; and (3) the name of the person responsible for the decision making in the absence of a school nurse.

All medications shall be handled and stored as outlined in this administrative regulation. Where possible, a separate supply of the child's medication shall be stored at the site of the before- or after-school program or school readiness program. If this is not possible, a plan must be developed and implemented to ensure the timely transfer of the medication from the school to the program and back on a daily basis.
