Re: Mobile Learning Committee

The District has been researching and testing various forms of mobile learning opportunities and the type of impact that it can have in the learning process. Additionally, a committee of CISD Educators was put together to research various methods to potentially integrate mobile devices at a deeper level as well as to perform site visits to learn from other districts that have implemented 1:1 mobile solutions. We would like to provide an update to the CISD Board of Trustees on where we are at as a committee and what the next steps are.

Recommendation: That the following item is placed on the April 8, 2013 special board meeting agenda as a report item.
