Totals:	63	10	0

We are currently working on OAKS preparation, particularly by coaching students how to take the practice tests and working on math skills. Increasing math scores is our primary goal in our school improvement plan. Our teachers have been working on strategies to help our students in ways that are effective in a virtual environment. Although teachers are able to help students one on one during home visits, there is a gap in individualized instruction between visits. The virtual math curriculum can be viewed repeatedly by students in the absence of a physical teacher; however, repetition of an unfamiliar concept does not necessarily lead to understanding. We seek to increase communication and education around math to fill in the instructional gaps.

Respectfully Submitted,

Jesse Eisenschmidt, Principal
Sheridan AllPrep Academy
