## Lewiston-Altura School District

Custodial / Maintenance Report

June 2026

### **Personnel Information**

We are currently fully staffed.

Lucas Daniels is scheduled to take his special boilers exam July 13.

Desire Mendoza has applied to test for her class 2C boilers license.

### **Training Conducted**

Staff completed OSHA required safety training on ladder safety.

### **Progress on Projects**

- Worked with Davis to install the new water softener at the high school, and the water softener is now operating.
- Working with MMC to install a replacement pump drive unit in the high school boiler room but they ordered the incorrect drive unit. The correct unit was then ordered. While here, the seal was installed in boiler pump 3.
- Various phases of the renovation project are underway.

### **Comments**

We are working to keep the grounds maintained during the construction project as well as working with Dave Phillips with Ingensa to complete any inside work that we can.

Respectfully Submitted,  
Dan Buege  
Facility Manager
