

# Action Sheet

**MEETING DATE:** November 16, 2022

**AGENDA ITEM:** Discuss and consider approval of purchases of Dell servers in the amount of \$102,848.81

Bond 2022 (Proposition D) included funds for technology infrastructure and equipment updates. As K-12 education has adopted more online services and applications, including providing devices to students on a one-to-one basis, it is necessary to update infrastructure and equipment to manage the additional traffic to the wide area network (WAN). For the first phase of the updates, the MIS department would like to use \$102,848.81 of Bond 2022 funds to modernize and refresh the Network Operations Center (NOC) servers that house our student information systems, employee data, and department files to improve business functions and student achievement. These servers will be purchased from Dell Technologies and Sterling using DIR contracts. As lead times are higher than normal, we expect order delays; however, we strive to complete the purchases within Fiscal Year 22-23.

See the attached quotes for more details.

**RECOMMENDATION:** I move the board approve purchases in the amount of \$102,848.81 for NOC server modernization, as presented.

Jerry Gibson  
Superintendent

Connie Morgenroth  
Assistant Superintendent of Business & Operations
