Projects;

- ❖ **The maintenance ground crew is almost done with demolition of the inside of our warehouse on the east side. We are now in the process of getting bids for the new freezer box. We still need to have the walls cut where the overhead doors are going and also the wall between the existing warehouse and the new side of the warehouse needs to come down if the structure engineer says that we can take it down.**
- ❖ **We are still trying to get the remodeling scheduled at Minico so that we can increase the size of our freezer and cooler boxes.**
