SPECIAL EDUCATION BOARD REPORT

June 11, 2019

The first item of business when I came on board was to complete all evaluations and they were all completed and turned in before I got walking pneumonia and a pacemaker for my heart. Thanks to technology I now have a new life.

We wanted to get all Individual Education Plans {IEP's} completed for the students by the last day of work. All staff were notified a month early and the Sped secretary reminded them at least once a week.

Check out day went fast and smooth due to giving advanced notice to staff, but it was a long and tiring day for our secretary. Colleen makes sure everything is complete and everything is accurate.

Alida Wright was able to find a Speech/Language Pathologist to agree to working a couple days a week with Head Start students. This person will be brought to the board agenda for approval.
