

Curriculum Director Report
March 20,2023

Infrastructure Test

We completed our annual infrastructure test for IAR at Lincoln School , and Pana Jr. High. The test went well, we do have a few chromebooks that have to be updated. Thank you Ms. Hahnenkamp, Mr. Holman, and Ms. Hahnenkamp for getting these done. We should be ready to go on Tuesday at the Jr. High.

Science Curriculum

We are selecting our science curriculum on Wednesday. The cost will be around \$100,000 over 5 years. Some of the things included in it are workbooks, online site license for teachers and students, kits for experiments, and then refills on those kits. I am really excited to upgrade our science curriculum.

Summer School Plans

We are planning on Summer School for grades K-8 to be from 8:30-11:30 each day. The Principals will be making plans for this over the next few weeks. We will post these jobs later this week.
