Student Information System (SIS) Recommendation

27

October

2025

Agenda

- 01 Committee overview / two-year timeline Slide 03
- 02 Current system: JMC – status & challenges Slide 05
- 03 Research & evaluation of alternatives Slide 06
- 04 Recommendation: moving to Infinite Campus Slide 07
- 05 Next steps & implementation roadmap Slide 08
- 06 Q & A Slide 09

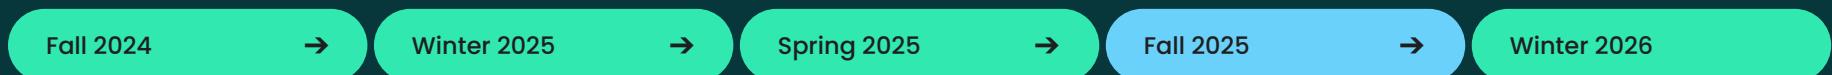

Committee Purpose & Membership

Charge: To evaluate the current SIS (JMC), identify system limitations, research alternatives, and recommend a platform to meet the district's growing needs for data integration and efficiency.

Committee Members: Emily Stull-Richardson, Jen Miller, Paula Green, Molly Papillon, Christina Holmes, Abi Swensen, Will Lyke, Gena Jacobson, Annette Klang, Beth Duffy, Christy Kuefler, Kelly Bitner, Monique VonEnde, Devan Bartels, Natalie Grady, Rose Bierce, Kathy Faust

Key Activities

Developed an evaluation rubric and conducted a staff survey to identify "must-have" functionalities.

Met with JMC, reviewed quotes for Skyward and Infinite Campus, and narrowed the SIS list.

Conducted in-depth demos, explored trial environments, and developed the final implementation recommendation

Brought recommendation to a larger committee. Met with a school who just made a switch. Bring recommendation to finance and board.

If approved, the project team (Molly, Christina, Paula, Will and Jen) would begin the switch.

Current system: JMC – status & challenges

Lack of/Difficulty with Integration

JMC does not currently have a working integration for our main platforms. Canvas, Edgenuity, Google Classroom for grading, SpEd Forms for Special Education, Clever and EduClimber for testing and data warehousing are all needed as the district grows.

Staff Support

We discovered many people were using workarounds within and outside of JMC to make it meet their needs. As the district grows, this model becomes less sustainable with the additional timing needed to do these processes. Efficiency is low with JMC.

Support for Students and Families

JMC doesn't fully support having all student data centralized where all people needing the data can access it due to the numerous platforms and access. Examples - ROI's for county partners, photo releases, communication logs and "banned" contacts.

Research & evaluation of alternatives

Stages	Create Rubric and Evaluation Criteria		Evaluate Possible SIS Systems		
Actions	Create a list of all uses for the SIS and what we would want in an ideal SIS	Narrow the list down to the "Must Haves" and what would make us leave JMC	Determine and evaluate possible SIS Systems	After evaluating SIS Systems determine which meets the most "Must Haves"	
Emotions					
Actions	<ul style="list-style-type: none">Survey to staff to collect data on uses for SIS System and what features they would like.Compile the list and evaluate what would be a "Nice to Have" and what is a "Must Have"Build the Evaluation Rubric around the "Must Haves"Identify the biggest challenges to moving systems - data transfer, training, etc. to help determine if the trade off will be of value in the end.	<ul style="list-style-type: none">Six Possible Providers for MN that are compatible with Ed-Fi and approved by the StateReach out to users of the different platforms to get guidance and adviceSet up meetings with the different vendors.Early eliminations - Due to a large data breach we eliminated PowerSchool and Synergy after they did not return phone calls or messages after multiple attemptsWe had JMC come and present so we could ensure the areas we were struggling with were due to the system and not due to lack of training/information on our sidePresentations with Infinite Campus and SkywardSandbox accounts with Campus and Skyward so we could "play" and see how they work on our ownReceived quotes from Skyward and CampusMet with a Co-Op that made the change from JMC to Campus last year and spent an hour asking questions and hearing from a user that has gone through the process			

Recommendation: Moving to Infinite Campus

The move to Infinite Campus will help support students and staff in multiple ways:

- Integration - Campus integrates with current LMS systems, but also has an extensive list of partners for any future needs. Working with a larger provider means more access.
- Efficiency - Easier data management and entry coupled with expansive reporting capabilities will allow staff to do more with the data spend less time digging.
- Access to student information in one place to help support student needs and programs like MTSS.
- The enrollment process will be faster, easier and consistent district-wide, and best of all, online!

Next Steps & Implementation Roadmap

Winter 2026

Winter 2025

Spring 2025

Spring 2025

July 2026

Kickoff meeting first with core team. Review data sheets for all data being moved from JMC.

Process and procedure meetings for each module - health service, SIS Admin, Teacher, etc. Detailing where processes are now and where they need to be for IC

Uploaded our data into IC. Once data is finalized, our site is created. We would have a sandbox and a live site.

Sandbox Trainings. All relevant staff come to the various trainings, so teachers, admin, coaches, etc all have a chance to be trained before we go live.

IC goes live.

Thank you!

Questions?
