Subject: Superintendent's Report

School Improvement Plan Summaries –

Attached to this item in the agenda are written summary reports from the buildings regarding their School Improvement Plan goals, activities, and the results of their work.

Beginning next year, the goals developed by each school will be presented at a meeting in the fall with a progress report offered to the Board in a winter regular meeting. I will work with the building administrators to establish these dates and place them within an amended version of the Board annual calendar.
