

Parkrose School District Vision Planning 2022

This school year our board has engaged in an effort to improve student empowerment in district decision making:

- Superintendent and Board visits with student leadership to discuss student needs
- Superintendent and Board involved student leaders in legislative advocacy day
- Board will determine process to elect/select student board representatives

Student suggestions:

- More than one student member represents (two)
- Student representatives are supported by a Senate (leadership body- could be leadership class, club leadership, etc...)
- Terms could be shorter to encourage more participation (alternates)
- Students elect their representatives and recommend to the board
- Consider offering credit or pay to student board representatives

Board needs to determine:

- What guidance will you follow from students?
- How many members?
- How will we train and onboard new members?
- What support does the board need?
- How do we make the role appealing to students who want to represent?
